

TiO₂ filters are highly effective in creating photo-catalyst absorbs & reacts with UVC light. The super reflective chamber with reactor cell creates optimum reflection, amplifying the purification efficiency by 10 times.

The most compact stylish, fully automatic, super-efficient and cost effective air purifier and steriliser for all home and working environments.

It is great for preventing Colds and FLU spreading as well as reducing toxic gases such as NO₂ Pollution.

You Can't Catch Them; SO WE DESTROY THEM; To Keep You Safe

HEPA filters are great at catching dust but the dangerous Nano sized particles that get deep into your lungs – sail straight through HEPA filters. Hextio uses the world's most advanced photo-catalytic oxidation reactor chamber to destroy all Nano particles, including viruses.
