99 m²

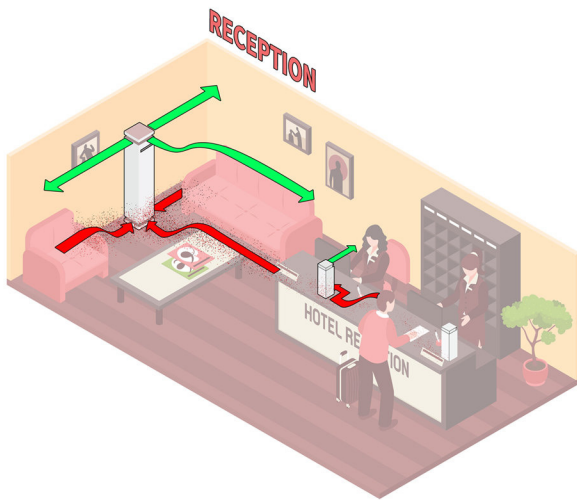

TiO₂ Filters
~70pcs

Net weight 33 kg	Dimension in mm 320D x 320L x 1220H	Max electricity 280 W
Power cord length 1.2 m	Free standing	Remote control included
Activated carbon filter 6000 hrs	Reactor cell lifespan 8000 hrs	HEPA filter lifespan 6000 hrs

Installation of the VK002

This is a plug and play unit and does not require specialized installation, however correct positioning in the space will optimize effectiveness. The unit must be positioned in such a way that it is able to pull contaminated air away from the breathing zone in the room and push clean air back out into the breathing zone.

Ideally, air flow from doors, windows or air conditioning units should assist with the unit's airflow, not go against it.

Maintenance of the VK002

Regular cleaning of the pre filter is important to keep the unit working at optimum performance. Simply remove the filter tray and vacuum the pre filter every week. If needed, the pre filter can also be washed with warm water. Please allow it to dry completely before placing it back into the unit.
